

## COMPANY FACT SHEET

Panoramic Corporation located in Fort Wayne, Indiana was formed in 1986 to design, manufacture, and market a panoramic X-ray machine for the domestic dental market. Panoramic customers have led us to award-winning status and market leadership.

While product quality and reliability have been a Panoramic hallmark, providing exceptional support in the field for these products is equally important. This is achieved with a network of local independent installation and service organizations throughout the U.S. and Canada. Additionally, in-house X-ray Specialists deliver service support as part of the exclusive Panoramic Platinum Care™ Package as more than 70% of all service related questions can be successfully resolved over the phone.

There are many things that set Panoramic Corporation apart from the competition. We invite you to explore and compare our industry-leading value proposition.

- Cadmium Telluride high efficiency sensor
